

Degree Program on Communications Engineering

Curriculum of "3+2" for B.Sc and
M.Sc starting from Fall 2005

Raimo.Kantola@tkk.fi

26.5.2005

1

B.Sc Degree structure

A2 – 20 Ects ? Module	B1 – 20 Ects Base Module	B.Sc thesis 10 Ects
		V – 10 Ects Electives
P 80 Ects Basic Studies Module	A1 – 20 Ects Base Module	
	O – 20 Ects Common Module	

2

Issues of cross checking with CS

- what does each program have to offer as reasonable B1 modeles for students of the other program in the B.Sc degree?
- what does each program have to offer as reasonable minors in the masters program to students of the other program?
- are there any individual courses in each of the programs that the other could and would like to borrow in a module?
- In the current programs networking technology has been a major in the CS program and there have been many majors produced by CS that have been offered at the CE program. Is there room for continuing this practice in the new degree programs? It is likely that it will take a long time to establish a new pattern of student behaviour of switching departments after the B.Sc degree. Does CS have any plans of opening a larger intake to masters programs than graduate in CS on the B.Sc level.

12

The remainder of B.Sc

- B1 – other A2 from Comm Eng or
A1 or A2 from another Degree Progr
- V1 – 10 Ects
- B.Sc thesis
 - seminar + presentation skills + thesis

Issue for this seminar: What modules CS has to offer as reasonable B1 modules for B.Scs in Communications Engineering.

13

Observations on BSc of Comm Eng

- Middle area studies (= broad technical understanding on a wide range of things+ methodic studies) have been cut
- A Comm Eng B.Sc has a strong Maths + Phys + CS + Electronics background + Comm Eng fundamentals + a bit professionally significant studies

14

M.Sc Majors have groups of Advanced Study modules – one selected for Major Majors on :
