HELSINKI UNIVERSITY OF TECHNOLOGY   **Exercise 4**
Networking Laboratory   Feb 14th, 2007
S-38.2188 Computer Networks, Spring 2007   Karvo/Ott

1. Write an *essay* on internetworking. Explain the tasks of different layers, and how they interoperate. If necessary, use charts to illustrate co-operation of different nodes. To get a practical viewpoint, discuss some specific application(s).

   Target: The student is able to express technical details in a clear, fluent, and concise manner. The student understands how a layered protocol architecture works in the Internet.
