Domestic and international traffic

The price of the Frame Relay service consists of the prices of: connecting the terminal equipment, on connection points monthly subscription monthly usage: in domestic network the price depends on the transfer speed. In the long-distance traffic price depends on the transmission speed and tariff zone. In the international traffic the price depends on the biggest and the guaranteed speed of transmission, and on the international tariff zone. lease of terminal equipment (optional)– the price depends on the type of equipment

- The service of leasing a line for a definite period, up to 90 days is calculated according to formulae.
- Tariff zones for the service of leasing a line in the international traffic are same as the tariff zones in the international telephone traffic. →
- The distribution of countries by zones is determined in the telephone service price list. →

Other services

- Transferring a subscriber line
 - in the domestic traffic: 50% of the connection fee
 - in the international traffic: 75% of the connection fee
- Changing the line parameters upon the subscriber's request: 100 HRK
- Reconnection (of the subscribers who were disconnected for not paying the bills): 15% of the connection fee

* Single payment, per each connection point.

Monthly usage

The formula for calculating the price of the Frame Relay data transfer service per each virtual cable:

$$U = C + 0,25 \times (E - C)$$

U – total price

C – CIR, guaranteed speed or scope

E – EIR, maximum speed or scope

- In the domestic traffic (the price depends on the biggest and the guaranteed transmission speed; it does not depend on the number of local switches through which the line passes)

The service of leasing an HT–owned terminal equipment by the user

Monthly:

Speed (bit/s)

The Frame Relay service for a definite period

- Connection for a definite time, single payment:

Speed (bit/s)	Price (HRK)	
	ex VAT	inc VAT
• up to 2 Mbit/s		
– Domestic traffic	500.00	610.00
– International traffic	500.00	610.00
• more than 2 Mbit/s		
– Domestic traffic	1,850.00	2,257.00
– International traffic	1,850.00	2,257.00

- Subscription and use for a definite time is calculated according to formulae:

Usage duration	Domestic traffic	International traffic
1. up to 30 days:	$3 \times N \times D/30$	$1,3 \times N \times D/30$
2. 30 to 90:	$2 \times N \times D/30$	$1,2 \times N \times D/30$

N – sum for indefinite period

D – duration (days)

* for the first 30 days the tariff 1. is applied and from 30 to 90 days tariff 2.
