

# **New Business Models for Public Wi-Fi Services**

**Connecting public sector organizations, private companies and homes**

**ict**TURKU  
Finland

**Braudel Rule:**

*freedom becomes value*

*when it changes the limits of the possible  
in the structure of everyday life*

**Functionality = Internet services and content**

- Mobile Office (office functionality everywhere)
- Personal Information Management: email, calendar, contacts, tasks
- VoIP, laptop videoconferencing, WebTV, WebRadio,...
- GIS, other services and content

**Value of an Internet service = autarchy value + synchronization value**

- Autarchy value = the value of the service when you use it alone
- Synchronization value = the value of that others use the same service

**Network effect** = sync value grows exponentially to the number of users

**Notice:** gatekeeper is the killer of the network effect

The Internet is a **scale free network** (Albert, Barabasi et al 1999) which is the most efficient type of network for the diffusion of ideas (Vespignani 2004)

**Brickstones:**

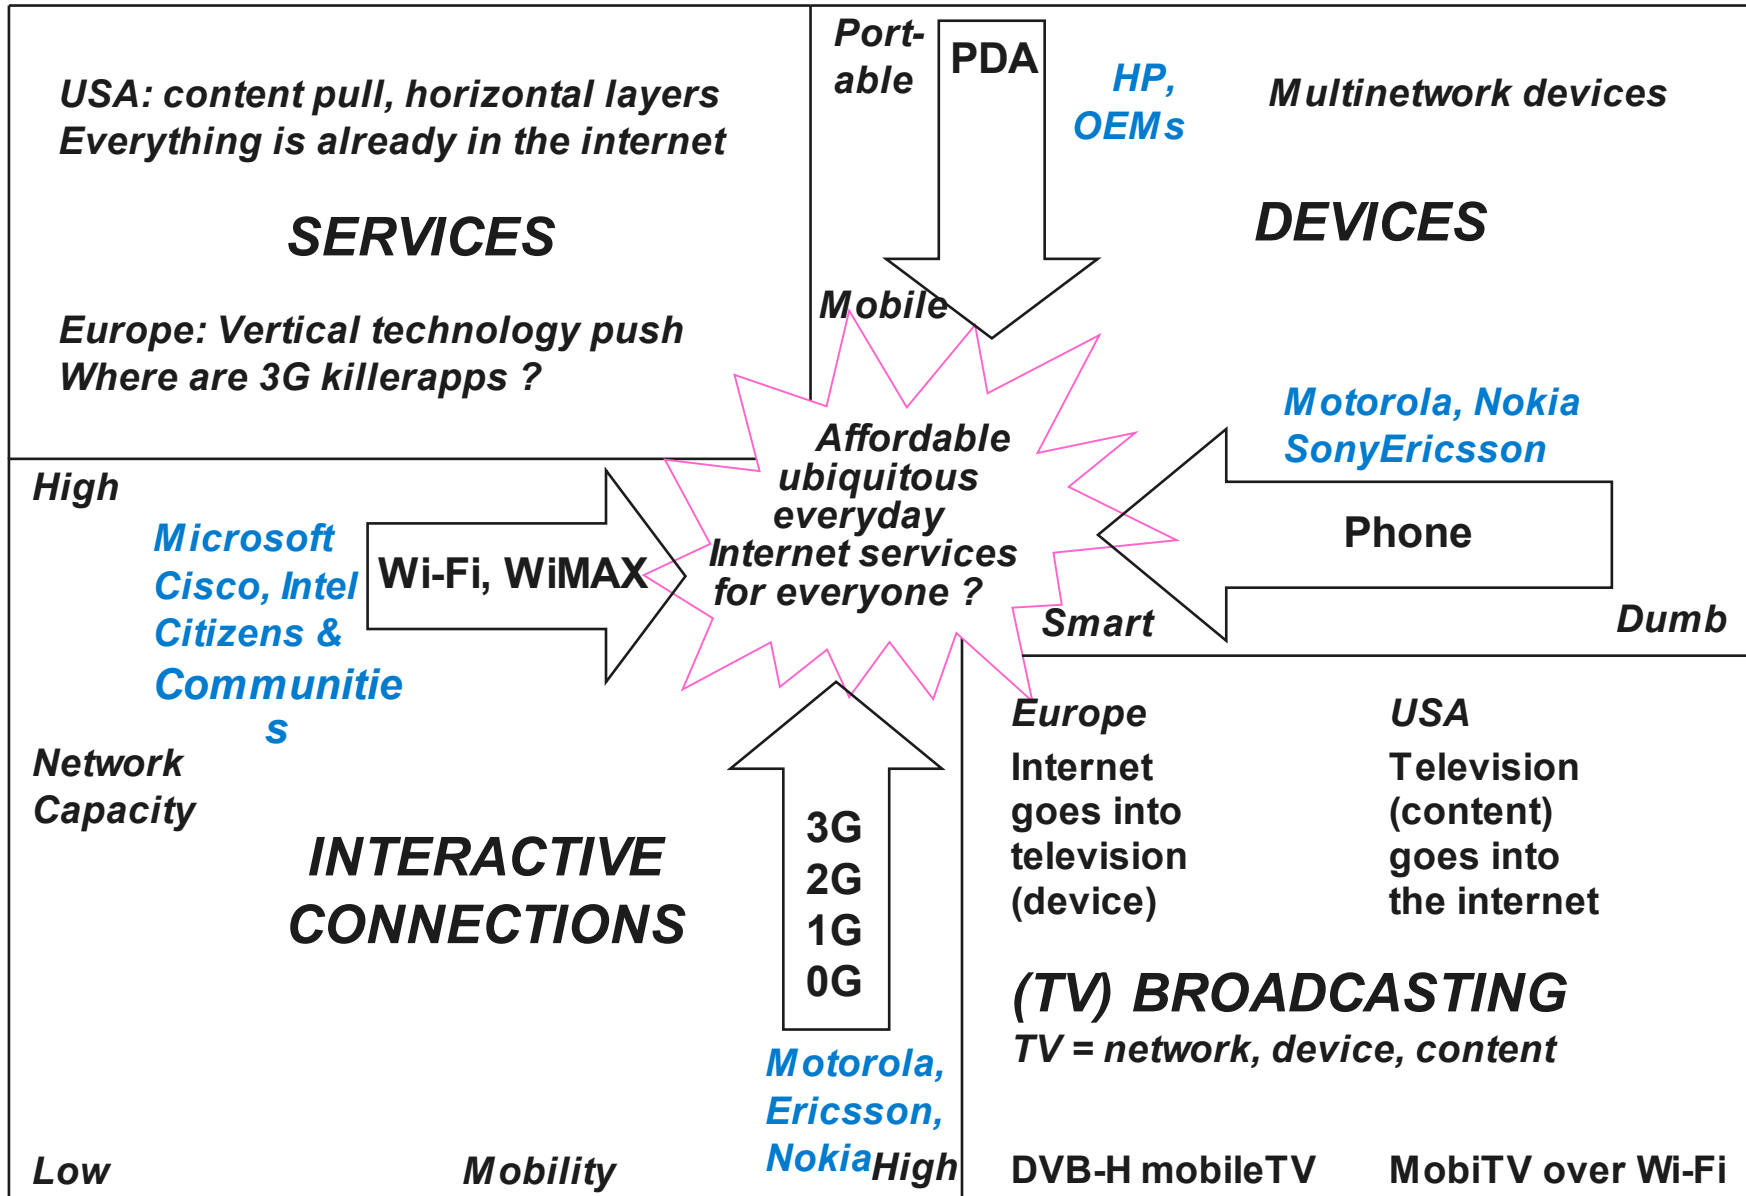

- Content
- Services

**INTERNET (IP network)**

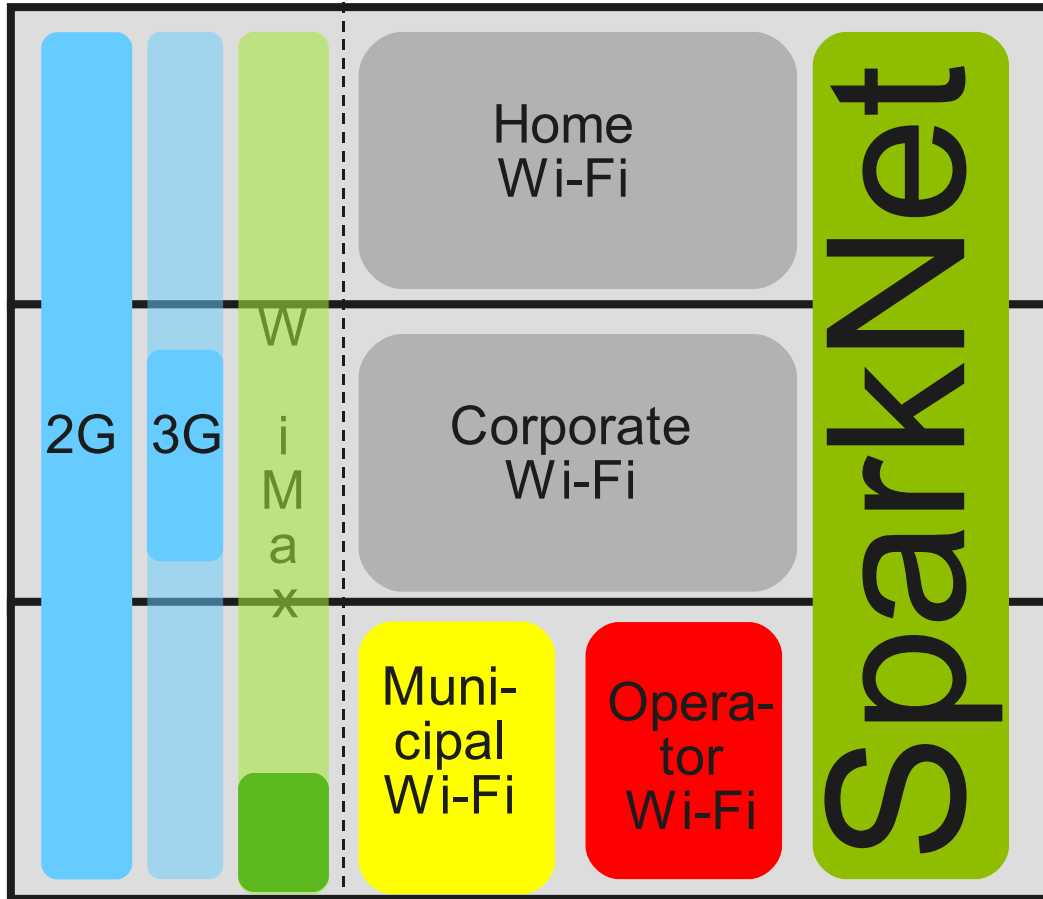

- Connections
- Devices

We don't need 3G-, Wi-Fi- or ADSL-services,  
But digital services = Internet services  
And Internet-connections (3G, Wi-Fi, ADSL...)

Acid test: users (for exaple students) should be able to use Internet-connection at home, at work and in public places as much as 5 hours daily

1. Place - home
2. Place - office
3. Place - public places

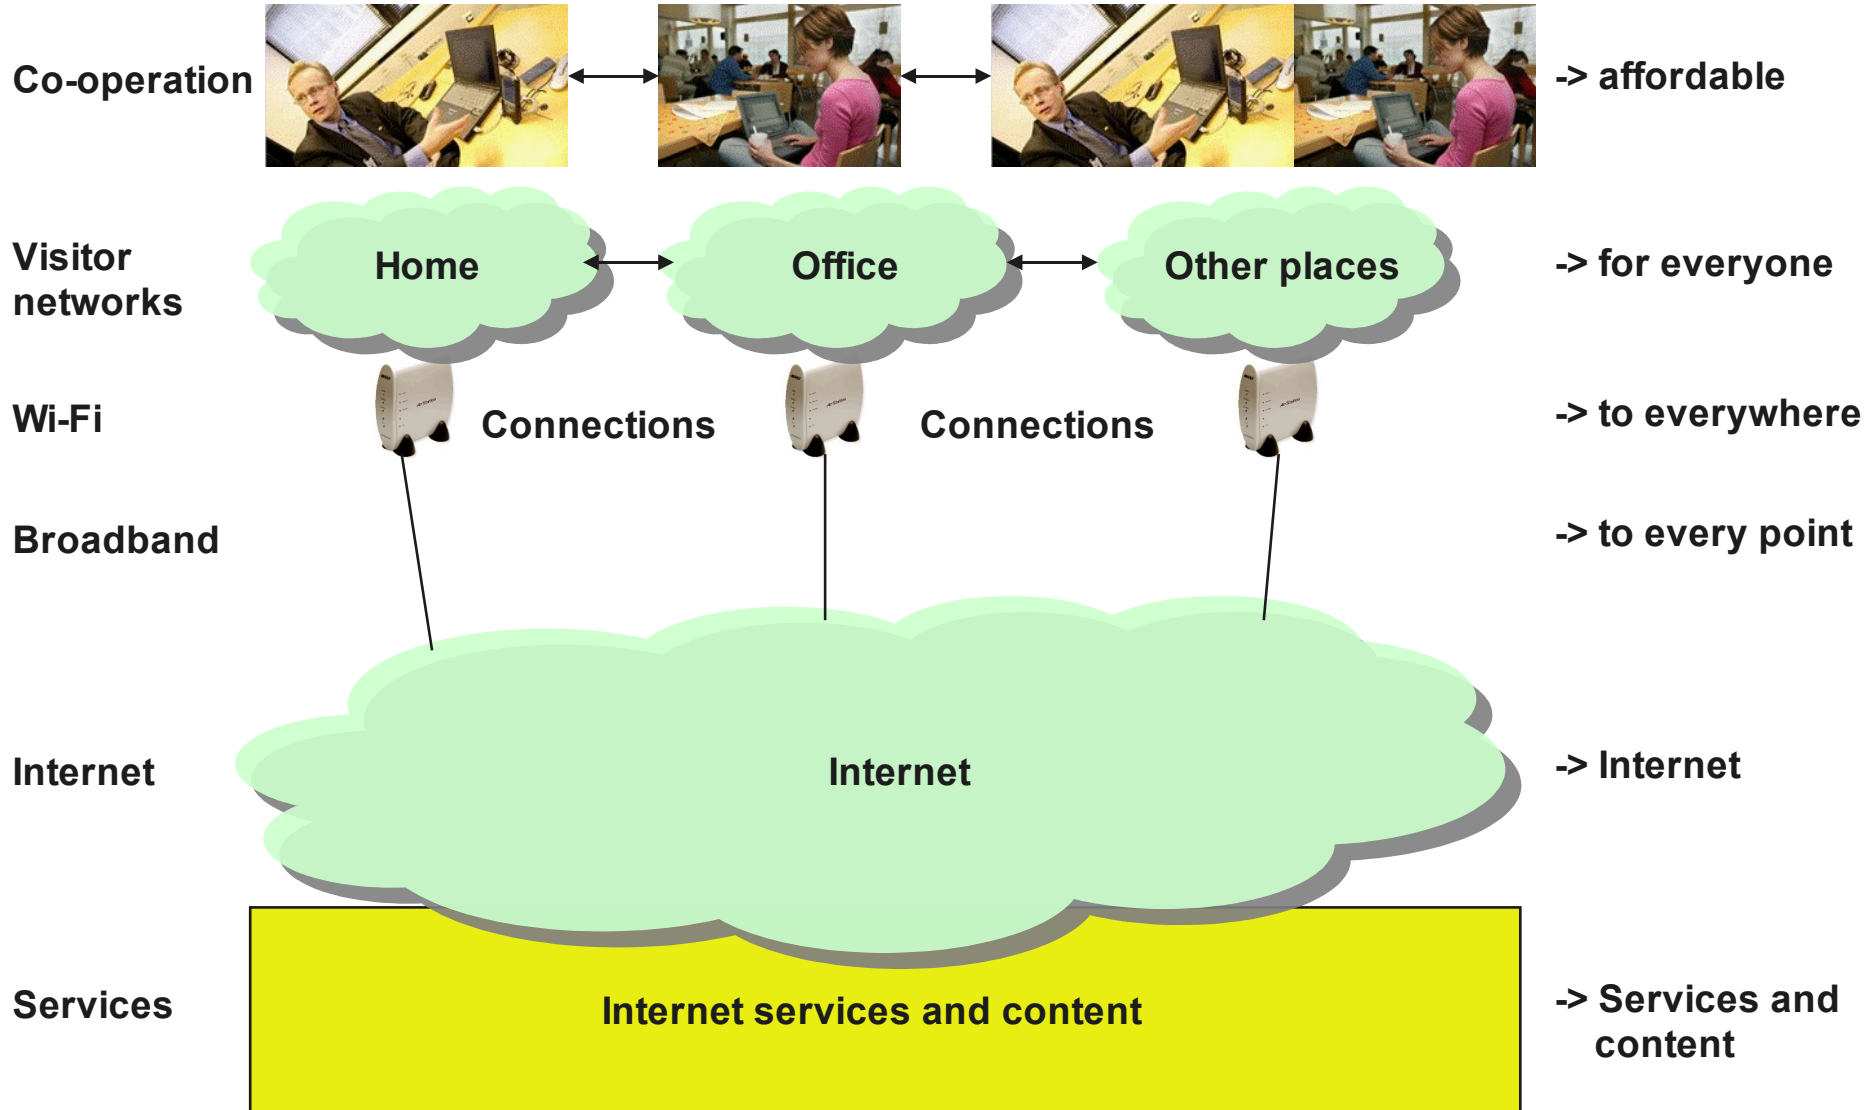

- SparkNet  
FON  
No biz
- SparkNet  
No biz
- SparkNet  
MuniWi-Fi  
Telco Wi-Fi  
The Cloud

**Three places**

- **Slower**
- **More expensive**
- **Licensed**

- **Faster**
- **More affordable**
- **Unlicensed**

**Business models**

ictTURKU

- Goal: Affordable Internet everywhere for everyone
- Benefits: Infrastructure for development and use of digital services
- Costs: Authentication server 2 k€, OpenSpark router 95 €
- Size: 2.000+ hot spots, 100.000+ registered users, 700+ networks
- Capacity: Access 2.000 \* 54 Mb/s , Internet c. 10 Gb/s
- Prizes: Productive Idea 2004, Stockholm Challenge finalist 2006, Baltic Challenge winner 2006 (ICT action of the year 2006)

Planet

Tuottava Idea

**E.G. Turku Airport + Nokia E61 + Suomen Puhelin Phonet + OpenSpark**

## Internet

- New
- Existing

## Authentication

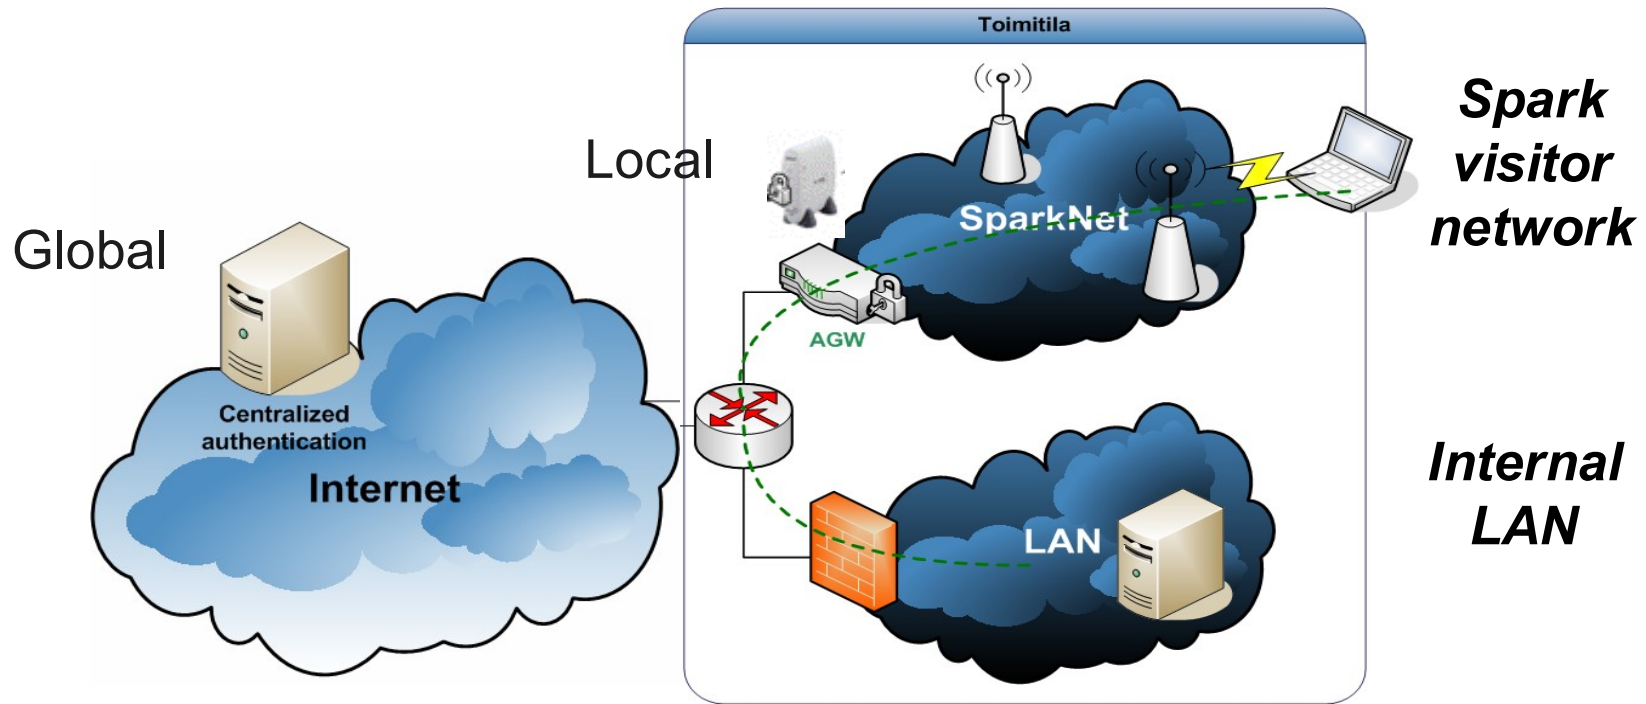

- AGW 1-server (2 t€)
- AGW 2-server (100 €)

## Connection

- VLAN
- Cables

## Access points

- Shared
- Dedicated

## Accessing SparkNet:

- Buy subscription (1.90 €/h)
- Participate in building of Information Society, OpenSpark community
- Host offers connection for his guests
